# Humans Take 20,000 Breaths Per Day

**Daily Pure Oxygen Intake**  
2,000 gallons or 7,570 litres

**Daily Pure Oxygen Consumption**  
379 gallons or 1,000 litres

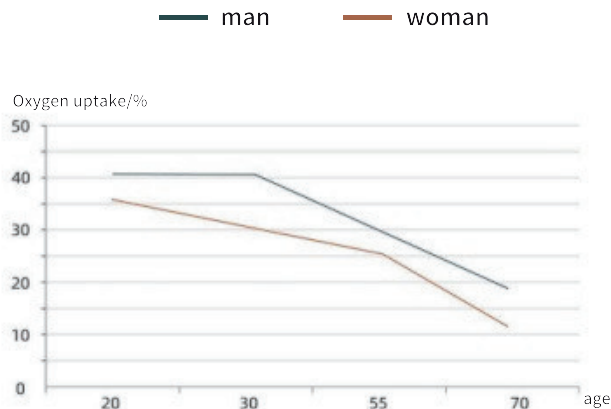

■ N<sub>2</sub>    ■ CO<sub>2</sub>, rare gases    ■ O<sub>2</sub>

Composition of the atmosphere

*Note: based on average 170lb adult*

# Oxygen Intake Capacity Decreases with Age

Declining at 2% per year for men and 2.5% per year for women

Note: Data from research trials by hemnassen (1973)

# Prevalence of hypoxia in functional tissue

## The Hidden Threat of Oxygen Deficiency

- **Lack of oxygen in the brain - the “silent killer” of memory**

Headache and dizziness, insomnia and forgetfulness, slow reaction time, risk of brain atrophy

- **Cardiac hypoxia - a cardiovascular “warning sign”**

Chest tightness and palpitations, arrhythmia, fatigue and tiredness, angina pectoris

- **Cellular hypoxia - the “hidden driver” of chronic disease**

Hypoxia-inflammation vicious cycle, joint pain, blurred vision, arteriosclerosis

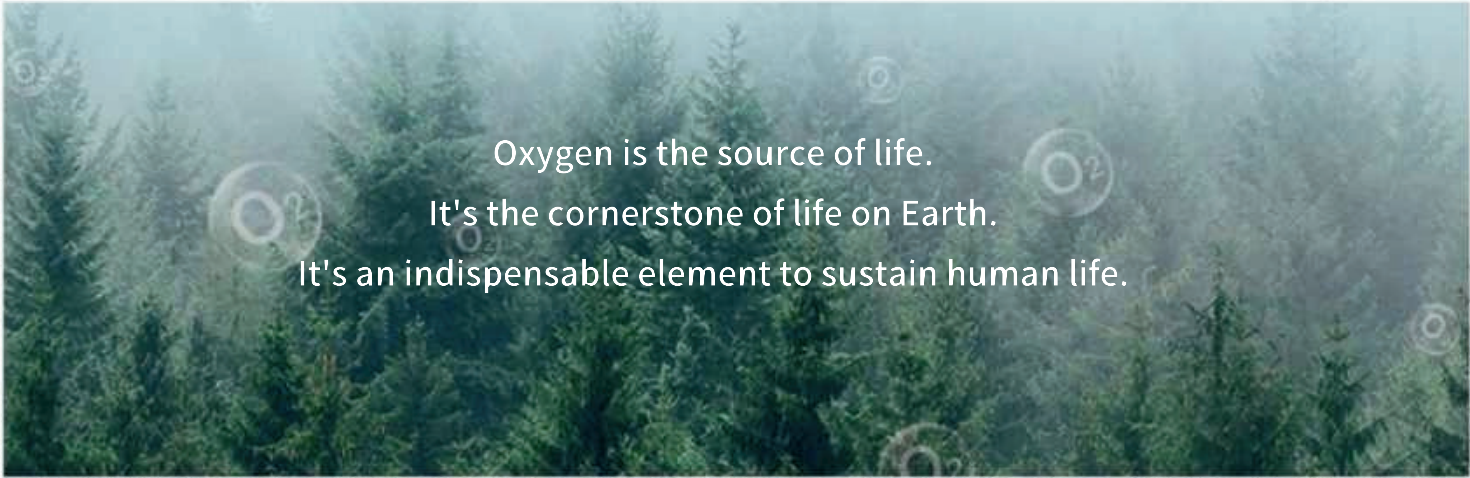

- **Lung hypoxia - the “invisible shackle” of respiration**

Shortness of breath and shortness of breath, nocturnal apnea, risk of COPD

- **Skin Oxygen Deficiency - The “Accelerator” of Aging**

Dullness and dryness, wrinkles, age spots, slow wound healing

Oxygen is the source of life.  
It's the cornerstone of life on Earth.  
It's an indispensable element to sustain human life.

## Nobel Prize Lack of oxygen is an important factor in many diseases

**2019 Nobel Prize in Physiology or Medicine revealed:** Cells are sensitive to the amount of oxygen in their environment, and under hypoxic conditions there is an increase in a molecule called hypoxia-inducible factor (HIF), which leads to changes in the expression of more than 300 genes, causing the cells to shift to a metabolic pattern that is completely different from that of an oxygen-rich state.

**Chronic oxygen deprivation will lead to accelerated aging of the body and increased risk of disease.**

—American Association for the Advancement of Science (AAAS) Science

# What Is Hyperbaric Oxygen, & How Is It Used?

---

Hyperbaric oxygen therapy (HBOT) delivers concentrated oxygen inside a sealed chamber pressurized above normal atmospheric levels (typically 1.3–2.0 ATA for mild chambers).

At increased pressure, oxygen dissolves more readily into blood plasma, allowing greater oxygen transport beyond red blood cells.

This elevated oxygen delivery reaches tissues where circulation may be limited or impaired.

Enhanced oxygenation supports cellular repair, reduces oxidative stress, and aids the body's natural recovery processes.

Chambers are utilized in wellness facilities, rehabilitation centers, athletic performance programs, and increasingly in private homes for personal health routines.

**HBOT increases the partial pressure of oxygen and enhances the end-to-end arrival of oxygen in the blood vessels.**

**Oxygen content at normal  
atmospheric pressure**

**Oxygen content at higher  
atmospheric pressure**

# OxyEdge Core Advantages

High Tech Instruments  
and Multiple  
Safety Measures

First-class luxury  
configuration and  
large oxygen therapy space

USA Oxygen Booster  
System 96% with High  
Purity Oxygen Generation

Eight levels of  
safety, security,  
and air filtration

Made with eco-friendly,  
EO-grade materials that meet  
the highest national  
safety standards

Large air volume ventilation  
system to keep the  
air fresh at all times

Ultra-high-strength cabin  
for superior safety  
and durability

Ultra-quiet technology.  
45 decibels  
in the cabin.

# OxyEdge

*Where Precision Meets Personalization*

# The OxyEdge Ascend Series

## CREST

**Capacity:** 1 - 2 People  
**Cabin Size:** 7' L × 3.6' W × 6' H  
**Cabin Pressure:** 1.3 - 2.0 ATA  
**Maximum Power:** 2050W  
*(main engine + air conditioner)*

## ELEVATE

**Capacity:** 2 - 4 People  
**Cabin Size:** 7' L × 6.6' W × 6.1' H  
**Cabin Pressure:** 1.3 - 2.0 ATA  
**Maximum Power:** 2350W  
*(main engine + air conditioner)*

## SUMMIT

**Capacity:** 4 - 6 People  
**Cabin Size:** 7' L × 11' W × 6.6' H  
**Cabin Pressure:** 1.3 - 1.5 ATA  
**Maximum Power:** 3600W  
*(main engine + air conditioner)*

# The OxyEdge Pinnacle Series

## HORIZON

**Capacity:** 1 - 2 People

**Cabin Size:** 6.75' L × 3.3' W × 6.2' H

**Cabin Pressure:** 1.3 - 2.0 ATA

**Maximum Power:** 2050W  
*(main engine + air conditioner)*

## EXPEDITION

**Capacity:** 2 - 4 People

**Cabin Size:** 6.6' L × 5.5' W × 6.4' H

**Cabin Pressure:** 1.3 - 2.0 ATA

**Maximum Power:** 2350W  
*(main engine + air conditioner)*

## ODYSSEY

**Capacity:** 4 - 6 People

**Cabin Size:** 11' L × 7' W × 6.6' H

**Cabin Pressure:** 1.3 - 1.5 ATA

**Maximum Power:** 3600W  
*(main engine + air conditioner)*

**More Luxury**  
**More Room**  
**More Custom Options**

# Customizable Interior Options

Business Class

Conference Room

Relaxing Comfort

Card Table

Tea Room

Meditation Space

Massage Chair

Double Recliners

# Titanium Edition/Black Gold Edition/Platinum Edition

💎 Ultimate Luxury    Ai+ More Intelligent    ✓ Completely Custom
